

SENIOR ENGINEER
LIBERTY CONSOLIDATED PLANNING COMMISSION

The Liberty Consolidated Planning Commission in Hinesville, Georgia is seeking a Senior Engineer to lead a new engineering group that is responsible for the review of the engineering and design elements, and the inspection of infrastructure built, for all proposed developments in all of the eight local governments in Liberty County, Georgia.

This is advanced professional, administrative and supervisory work managing a major program or system of the Liberty Consolidated Planning Commission that serves all local governments in Liberty County, Georgia. This position includes guiding and directing such activities as: the engineering design and review of engineering design elements for all proposed developments in the county, inspection of infrastructure improvements during and after construction for all development activities, and engineering review of all proposed subdivisions and site developments. These functions include specifically the inspection, design, and review of design, for storm water facilities, water distribution systems, sanitary sewer systems, roadways, and other general civil engineering work. Work involves responsibility for planning, coordinating, implementing and maintaining a multi-agency engineering program. Work includes working with a team of, and coordinating the activities of, professional engineers, professional planners, technical specialists and support personnel participating in assigned program or system activities. Employees receive general guidance and direction, but have broad latitude for exercising initiative and independent judgment in the performance of work assignments. Work is reviewed through observations of effectiveness of work and products, periodic reports and consultations.

A Bachelor's Degree from an accredited college or university with major course work in civil engineering or related field, with a Master's Degree in engineering highly desirable; seven (7) years or more of responsible professional engineering experience, including four (4) years experience managing and/or supervising other professionals; or any equivalent combination of relevant training and experience. Certification as a Professional Engineer in the State of Georgia, or certification in another state and be able to obtain registration in Georgia within six (6) months, is required. Salary is compensable with experience. The position is open until filled. **EOE**
